CATO ELONGATED 1.28 TOILET TULIPAN | WHITE

INSTALLATION PROCEDURE GUIDE

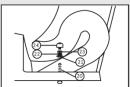

1.- Mark on the floor with a pencil or chalk color, the lines that cross through the center drain pipe. Place the toilet bowl with reference to the midline horizontal and mark the points through the holes in the base of the bowl, that will serve to prepare the holes where the anchors and Screw will be placed to attach the toilet.

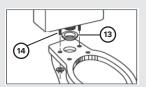

2.- Remove the toilet bowl and install anchors, place and secure the flange to the floor with the screws (20), put the screws through the flange channel, parallel to the wall. If you use wax neck make sure it is well adhered to the base of the toilet bowl.

3.- Place the toilet bowl by passing the lag screws (20) through the holes of the base, push down to connect to the flange and then rotate to ensure that the toilet bowl will stay well seated on the surface.

4.- Adjust the based bolt caps (21), metal washers (22),lock nuts (23) and bolt caps (24) on the toilet lag screws (20), then tighten up moderately to atach well.

5.- . To install the tank is necessary to insert the sponge gasket (13) from the threaded portion of the valve, once is installed, set the tank on the bowl making sure the holes match for the assembly of the 2 pieces (tnk / bwl) Insert the bolts (14) inside the tank by placing the tapered gasket on the screw downwards and tighten the nut (11) moderately to fix the tank.

6.- . To adjust the water level to the marked level in the tank, push the latch and lift the float to raise the water level to decrease and lower.

1.-Fill Valve 2.-Insurance regulator 3.-Float 4.-Recovery hose 5.-Cone gasket (V. Fill) 6.-Locknut (V. Fill) 7 -Flush Valve 8.-Flapper

9.-Cordon shutter

10.-Clip

11.-Cone Gasket (V. Flush)

12.- Valve nut

13.-Sponge Gasket

14.-Bolts Tank

15.-Conic Packing

16.-Hexagonal nut

17.-Handle

18.-Flange 19.-Wax ring

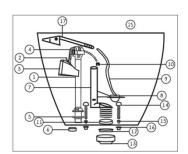

20.- Lag Screws

21.- Bolt caps base 22.- Metal washers

23.- Nuts

24.- Bolts caps 25.- Fill valve hose

26.- Seat (Only CATOPACK)

WARRANTY INFORMATION

This product is warranted for manufacturing defects for 5 years in ceramics and 1 year in tank fittings, from date of purchase. It is considered out of warranty, if the user changes any of the original parts of the product.
